Professional Summary

Working as a Junior Full Stack Developer at Tanasvi Technologies, I develop and maintain responsive web applications across both frontend and backend. I actively collaborate with designers and senior developers to implement features, debug issues, and optimize application performance. This role is helping me strengthen my coding, problem-solving, and teamwork skills through hands-on experience in real-world projects..

Work Experience

- **Tanasvi Technologies Private Limited – Junior Full Stack Developer (Internship + full time)**
July 2025 – Present | Visakhapatnam, IT SEZ
Worked on frontend development and UI for real client projects, including **MyCareerBuild**, **VFNCC**, **TechLiv**, and currently **Horilla HRMS**. Leveraged AI tools and agents including ChatGPT, Grok, Qwen, Claude, Antigravity, and Cursor AI to optimize workflows, accelerate development, and improve project delivery.
Maintained code repositories using GitHub and Bitbucket, ensuring clean, organized, and collaborative development. Contributed to prompt engineering tasks, creating optimized prompts to enhance outputs from LLMs and AI-assisted platforms.
-

Education

- **Bachelor of Technology (B.Tech)** in Information Technology
Kakinada Institute of Technological Sciences, 2021 – 2025
Graduated: May 2025 | Percentage: 67%
-

Technical & AI Skills

- **Frontend Development:** React, JavaScript, HTML, CSS – building responsive and user-friendly interfaces.
- **Backend Development:** Node.js, Express.js, REST APIs, Postman, Swagger – server-side development and API integration.
- **Databases:** MySQL, PostgreSQL, MongoDB – designing and managing relational and non-relational databases.

- **Version Control & Collaboration:** GitHub, Git, Git Desktop, Bitbucket – maintaining clean code repositories and collaborative workflows.
 - **AI / Prompt Engineering Tools:** ChatGPT, Claude, Grok, Qwen, Cursor, Antigravity, Lovable – experienced in crafting optimized prompts and leveraging AI agents to accelerate workflows.
-

Projects & Portfolio

- **MyCareerBuild** – <https://mycareerbuild.com/>
Role: Frontend Developer | **Tools:** React, JavaScript, HTML, CSS, Cursor AI, Antigravity, ChatGPT
Developed responsive UI and integrated AI-assisted workflows for real client project.
 - **VFNCC** – <https://vfncc.org/>
Role: Frontend Developer | **Tools:** React, JavaScript, AI agents
Built and maintained user interfaces with AI-assisted development support.
 - **TechLiv** – <https://techliv.net/>
Role: Frontend Developer | **Tools:** React, JavaScript, Cursor AI
Delivered high-quality UI components and leveraged AI tools to speed up development.
 - **ShipGen** – <https://shipgen.net/>
Role: Frontend Developer | **Tools:** React, AI agents, ChatGPT
Contributed to frontend development with AI-assisted optimization.
 - **Personal Portfolio** – <https://taruninti.vercel.app/>
Role: Developer | **Tools:** React, AI tools
Designed and developed personal portfolio website, showcasing projects and AI experiments.
 - **Sonic sync – APK**
Role: Developer (own project) | **Tools:** Rust, WebSockets, Tokio, Android (NDK), React, Cargo
Developed a real-time synchronized audio playback system with a Rust time server, custom sync protocol, clock offset correction, and millisecond-accurate playback across multiple clients and Android devices.
 - **Offline OCR Text Extractor (APK) –**
Role: Developer (own project) | **Tools:** Rust, OCR, Android, Tesseract/Native bindings
Built a fully offline OCR-based Android application for accurate text extraction from PDFs and images using a Rust-powered processing engine.
-

Achievements / Certifications

- Cisco Cyber security Fundamentals certification
- SkillDzire full stack java certification
- SkillDzire cyber security Certification
- Be10x AI Tools Workshop Certification
